

REMARKS

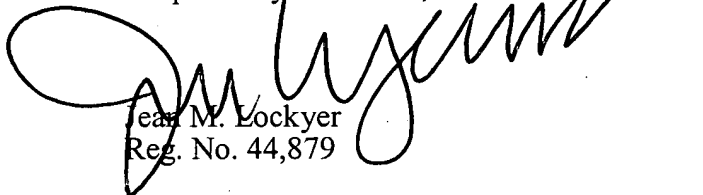

The amendments to paragraphs beginning on pages 5, 25, 46, 58 and 60 insert sequence identifiers (SEQ ID NO:) at proper locations in the Specification to conform with 37 C.F.R. §§1.821 to 1.825. The amendment to SEQ ID NO:1 in the "Table of Sequences" on page 63 underlined the stop codon as indicated in the header to SEQ ID NO:1, increased the font of the bolded thymidine residue in the sequence, and added a description for the bolded thymidine to emphasize this nucleotide position from that in the corresponding SEQ ID NO:3, where it is replaced by a cytosine residue in the same bolded font at the same corresponding position.

Applicants request entry of this amendment in adherence with 37 C.F.R. §§1.821 to 1.825. This amendment is accompanied by a floppy disk containing the above named sequences, SEQ ID NOS:1-26, in computer readable form, and a paper copy of the sequence information which has been printed from the floppy disk.

The information contained in the computer readable disk was prepared through the use of the software program "PatentIn" and is identical to that of the paper copy. This amendment contains no new matter.

If the Examiner believes a telephone conference would expedite prosecution of this application, please telephone the undersigned at 415-576-0200.

Respectfully submitted,

Jean M. Lockyer
